# 820 Payment Order/Remittance Advice

Functional Group ID= RA

### **Introduction:**

This Draft Standard for Trial Use contains the format and establishes the data contents of the Payment Order/Remittance Advice Transaction Set (820) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to make a payment, send a remittance advice, or make a payment and send a remittance advice. This transaction set can be an order to a financial institution to make a payment to a payee. It can also be a remittance advice identifying the detail needed to perform cash application to the payee's accounts receivable system. The remittance advice can go directly from payer to payee, through a financial institution, or through a third party agent.

#### **Notes:**

- 1. This transaction set will be used by the disbursing office to transmit remittance advice to the vendor or designated third party.
- 2. The monetary amount in BPR02 should be the sum of all "outer" loop values in data element ADX01 and all data element RMR04 amounts, if present. The data cited in data elements BPR12-15 are in effect, the vendor's Electronic Funds Transfer (EFT) "Remit To" electronic address. The date cited in BPR16 is the date used for early discount and late payment calculations.
- 3. For a vendor with a single EFT account, only data elements BPR02 and BPR16 will vary per payment.

# **Summary:**

	Pos.	Seg.		Req.	Req.		
	No.	<u>ID</u>	<u>Name</u>	Des.	Max.Use	Repeat	<b>Comments</b>
Must Use	010	SE	Transaction Set Trailer	M	1		

# **Transaction Set Notes**

- 1. The ENT loop is for vendor or consumer third party consolidated payments.
- **2.** The TXP loop is for tax payments.
- **3.** The DED loop is for child support payments.
- **4.** The LX loop is for pension payments.

# **Transaction Set Comments**

- 1. The TRN segment is used to uniquely identify a payment order/remittance advice.
- 2. The CUR segment does not initiate a foreign exchange transaction.
- 3. The N1 loop allows for name/address information for the payer and payee which would be utilized to address remittance(s) for delivery.
- **4.** ENT09 may contain the payee's accounts receivable customer number.
- 5. Allowing the NM1 segment to repeat in this area allows the paying entity within a payer and the paid entity within a payee to be identified (not the payer and payee).
- 6. This ADX loop contains adjustment items which are not netted to an RMR segment in this transaction

set.

- 7. Loop IT1 within the ADX loop is the adjustment line item detail loop.
- **8.** Loop RMR is for open items being referenced or for payment on account.
- **9.** Loop IT1 within the RMR loop is the remittance line item detail loop.
- 10. This ADX loop can only contain adjustment information for the immediately preceding RMR segment and affects the amount (RMR04) calculation. If this adjustment amount is not netted to the immediately preceding RMR, use the outer ADX loop (position 080).
- 11. Loop IT1 within the ADX loop is the adjustment line item detail loop.

Segment: ST Transaction Set Header

**Position:** 010

Loop:

Level: Heading Usage: Mandatory

Max Use: 1

Purpose:

To indicate the start of a transaction set and to assign a control number

Syntax Notes:

**Semantic Notes:** 

1 The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).

#### **Comments:**

	Ref.	Data				
	<u>Des.</u>	<b>Element</b>	<u>Name</u>	Att	<u>ributes</u>	
Must Use	ST01	143	<b>Transaction Set Identifier Code</b>	M	ID 3/3	
			Code uniquely identifying a Transaction Set			
			Refer to 003070 Data Element Dictionary for acceptable code values.			
Must Use	ST02	329	<b>Transaction Set Control Number</b>	M	AN 4/9	
			Identifying control number that must be unique within the transaction s functional group assigned by the originator for a transaction set			
			This unique control number is assigned by the originator of the			
			transaction set or by the originator's application progre	am.	This same	
			number is carried in SE02.			

Segment: BPR Beginning Segment for Payment Order/Remittance Advice

**Position:** 020

Loop:

Level: Heading Usage: Mandatory

Max Use: 1

Purpose: To indicate the beginning of a Payment Order/Remittance Advice Transaction Set

and total payment amount, or to enable related transfer of funds and/or information

from payer to payee to occur

**Syntax Notes:** 1 If either BPR06 or BPR07 is present, then the other is required.

- 2 If BPR08 is present, then BPR09 is required.
- 3 If either BPR12 or BPR13 is present, then the other is required.
- 4 If BPR14 is present, then BPR15 is required.
- 5 If either BPR18 or BPR19 is present, then the other is required.
- **6** If BPR20 is present, then BPR21 is required.

### **Semantic Notes:**

- 1 BPR02 specifies the payment amount.
- When using this transaction set to initiate a payment, all or some of BPR06 through BPR16 may be required, depending on the conventions of the specific financial channel being used.
  - BPR06 and BPR07 relate to the originating depository financial institution (ODFI).
- 3 BPR08 is a code identifying the type of bank account or other financial asset.
- **4** BPR09 is the account of the company originating the payment. This account may be debited or credited depending on the type of payment order.
- 5 BPR12 and BPR13 relate to the receiving depository financial institution (RDFI).
- 6 BPR14 is a code identifying the type of bank account or other financial asset.
- BPR15 is the account number of the receiving company to be debited or credited with the payment order.
- **8** BPR16 is the date the originating company intends for the transaction to be settled (i.e., Payment Effective Date).
- **9** BPR17 is a code identifying the business reason for this payment.
- **10** BPR18, BPR19, BPR20 and BPR21, if used, identify a third bank identification number and account to be used for return items only.
- 11 BPR20 is a code identifying the type of bank account or other financial asset.

Segment: TRN Trace

**Position:** 03:

Loop:

Level: Heading Usage: Optional

Max Use: 1

Purpose: To u

To uniquely identify a transaction to an application

**Syntax Notes:** 

**Semantic Notes:** 1 TRN02 provides unique identification for the transaction.

- 2 TRN03 identifies an organization.
- 3 TRN04 identifies a further subdivision within the organization.

#### **Comments:**

**Notes:** 

- 1. Use this 1/TRN/035 segment to allow an originator to identify a transaction for tracking purposes.
- 2. Although use of this segment is optional, failure to cite a reference number in TRN02 will make it difficult to identify this transaction set in an Application Advice, 824 transaction set.
- 3. Use of a Trace Number is required when submitting an Automatic Clearing House (ACH) to a financial institution.

Segment: N1 Name

**Position:** 070

Loop: N1 Optional

Level: Heading Usage: Optional

Max Use: 1

**Purpose:** To identify a party by type of organization, name, and code

**Syntax Notes:** 1 At least one of N102 or N103 is required.

2 If either N103 or N104 is present, then the other is required.

# **Semantic Notes:**

#### **Comments:**

- 1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
- 2 N105 and N106 further define the type of entity in N101.

#### **Notes:**

- 1. Use two repetitions of the N1 loop to identify at least the payer and payee organizations. One iteration for the payee is mandatory. A second iteration for the payer is optional.
- 2. Whenever possible, address information should be transmitted using code values contained in a combination of the N101 and N103/04 data elements Use N102 and N2-N4 segments only when it is necessary to transmit the full address. For example, if a vendor can be identified by a Data Universal Numbering System (DUNS) number, it is not necessary to transmit the vendor's full address since the relationship between the DUNS number and the vendor's address can be established by accessing a data base in which the information is stored, having been put there at the time the vendor electronically registered as a federal government trading partner.
- 3. Use the 1/N1/070 loop to identify organization(s) or persons that apply to all of the line items, or are not applicable at the line item level. When the addresses vary by line item, use the 2/NM1/020 loop.

Segment: ENT Entity

**Position:** 010

Loop: ENT Optional

Level: Detail
Usage: Optional

Max Use: 1

**Purpose:** To designate the entities which are parties to a transaction and specify a reference

meaningful to those entities

**Syntax Notes:** 1 If any of ENT02 ENT03 or ENT04 is present, then all are required.

2 If any of ENT05 ENT06 or ENT07 is present, then all are required.

3 If either ENT08 or ENT09 is present, then the other is required.

#### **Semantic Notes:**

#### **Comments:**

- 1 This segment allows for the grouping of data by entity/entities at or within a master/masters. A master (e.g., an organization) can be comprised of numerous subgroups (e.g., entities). This master may send grouped data to another master (e.g., an organization) which is comprised of one or more entities. Groupings are as follows:
  - (1) Single/Single: Only ENT01 is necessary, because there is a single entity (the sending master) communicating with a single entity (the receiving master).
  - (2) Single/Multiple: ENT05, ENT06, and ENT07 would be used to identify the entities within the receiving master. The sending master is a single entity, so no other data elements need be used.
  - (3) Multiple/Single: ENT02, ENT03, and ENT04 would be used to identify the entities within the sending master. The receiving master is a single entity, so no other data elements need be used.
  - (4) Multiple/Multiple: ENT02, ENT03, and ENT04 would be used to identify the entities within the sending master. ENT05, ENT06, and ENT07 would be used to identify the entities within the receiving master.

This segment also allows for the transmission of a unique reference number that is meaningful between the entities.

# **Notes:**

Agencies will use either a single iteration of the 2/ENT/010 loop for a remittance advice directly to the payee organization (single/single as described in comments 1 and 2), or more than one iteration, if a consolidated payer (for multiple/single transaction), as described in comments 3 and 4.

### **Data Element Summary**

Segment: NM1 Individual or Organizational Name

**Position:** 020

Loop: NM1 Optional

Level: Detail
Usage: Optional

Max Use: 1

**Notes:** 

Purpose: To supply the full name of an individual or organizational entity
Syntax Notes: 1 If either NM108 or NM109 is present, then the other is required.

2 If NM111 is present, then NM110 is required.

**Semantic Notes:** 1 NM102 qualifies NM103.

**Comments:** 1 NM110 and NM111 further define the type of entity in NM101.

1. Use two repetitions of the N1 loop to identify at least the payer and payee organizations. One iteration for the payee is mandatory. A second iteration for the payer is optional.

- 2. Whenever possible, address information should be transmitted using code values contained in a combination of the N101 and N103/04 data elements Use N102 and N2-N4 segments only when it is necessary to transmit the full address. For example, if a vendor can be identified by a DUNS number, it is not necessary to transmit the vendor's full address since the relationship between the DUNS number and the vendor's address can be established by accessing a data base in which the information is stored, having been put there at the time the vendor electronically registered as a federal government trading partner.
- 3. Use the 1/N1/070 loop to identify facility or geographic location that applies to all of the line items, or are not applicable at the line item level. When the addresses vary by line item, use the 2/N1/020 loop.

Use, if necessary, to provide the title of the party in PER02.

Segment: ADX Adjustment

**Position:** 080

Loop: ADX Optional

Level: Detail Usage: Optional

Max Use: 1

Purpose: To convey accounts-payable adjustment information for the purpose of cash

application, including payer-generated debit/credit memos

Syntax Notes: Semantic Notes:

1 If either ADX03 or ADX04 is present, then the other is required.

- 1 ADX01 specifies the amount of the adjustment and must be signed if negative. If negative, it reduces the payment amount; if positive, it increases the payment amount.
- 2 ADX02 specifies the reason for claiming the adjustment.
- 3 ADX03 and ADX04 specify the identification of the adjustment.

## **Comments:**

**Notes:** 

- 1. Use this 2/ADX/080 loop when payment amount differs from invoice to indicate adjustments included in the total amount paid based on adjustments to previously submitted invoices, not related to those indicated in the 2/RMR/150 loop. Segment can only be used when payment method is CTX or when sending remittance separately.
- 2. Use multiple iterations of this 2/ADX/080 to indicate multiple adjustments and reasons.
- 3. The outer ADX loop contains adjustment items that are not specifically netted to an RMR segment in the same transmission. An adjustment is being made to a previously remitted invoice not referenced in any of the RMR segments listed in the current transmission. An ADX loop can also be used in an account payable, post audit process with an adjustment presented after the original invoice is processed. Because of the timing difference, this may cause the adjustment to appear in the outer loop of the same transmission in which the RMR segment is referenced.

#### **Data Element Summary**

	Ref.	Data			
	Des.	<b>Element</b>	<u>Name</u>	Att	<u>ributes</u>
Must Use	ADX01	782	Monetary Amount	$\mathbf{M}$	R 1/15
			Monetary amount		
			<ol> <li>Use to indicate the adjustment amount.</li> <li>Use a minus sign to indicate a debit.</li> </ol>

			Code indicating reason for debit or credit memo or adjust	stme	nt to invoice,

003070F820 0 39 14 November 1997

debit or credit memo, or payment

Use any authorized codes but listed codes are preferred.

51 Interest Penalty Charge

Use to pay interest additional penalty under the Prompt Payment Act.

- 52 Credit for Previous Overpayment
- 81 Credit as Agreed
- L1 Audit

An itemized charge has been adjusted to this amount due to a re-audit being performed; that audit identified a variance between the amount authorized by the receiver of that goods/service and the amount charged by the provider of the goods/service

Use to indicate an itemized charge has been adjusted to the amount due to a pre-audit being performed; that audit identified a variance between the amount authorized by the receiver of the goods/service and the amount charged by the provider of the goods/service.

L2 Discount

The dollar value of the discount applied which reduces the payment amount due the payee

Use to indicate the dollar value of the discount applied that reduces the payment amount to the payee.

L3 Penalty

The dollar value of the penalty assessed a business entity for a past due debt

Use to indicate the dollar value of the penalty assessed a business entity for a past due debt.

L4 Administrative Fees

The dollar value of the administrative fee assessed a business entity for handling a debt

Use to indicate the dollar value of the administrative fee assessed a business entity for handling a debt.

L5 Interest Due

The dollar value of interest assessed a business entity for a past due debt

Use to indicate interest due to government.

L6 Interest Owed

The dollar value of interest owed a business entity for a past due payment

Use to indicate a late payment under the Prompt Payment Act.

L7 Miscellaneous Deductions

A deduction taken from the amount due a business entity for

which no specific reason code exists; this code must be accompanied by a free-form explanation of the deduction

Use to indicate a deduction taken from the amount due a business entity for which no specific reason code exists. When used, provide an explanation in REF03 of the 2/REF/110 segment.

L8 Miscellaneous Credits

An amount that increases the payment due a business entity for which no specific reason code exists; this code must be accompanied by a free-form explanation of the credit. Use to indicate an amount that increases the payment due a business entity for which no specific reason code exists. When used, provide an explanation in REF03 of the 2/REF/110 segment.

LP Late Payment

Use to indicate a late payment under the Prompt Payment Act.

Refer to 003070 Data Element Dictionary for acceptable code values.

#### ADX03 128 Reference Identification Qualifier

X ID 2/3

Code qualifying the Reference Identification

- 1. Use to indicate the previous invoice or other billing document number for affecting the current adjustment.
- 2. While any approved code may be used, listed codes are preferred
- AM Adjustment Memo (Charge Back)
- BL Government Bill of Lading
- BM Bill of Lading Number
- CL Seller's Credit Memo
- CM Credit Memo
- CN Carrier's Reference Number (PRO/Invoice)
- DB Buyer's Debit Memo
- DL Debit Memo
- IK Invoice Number

Manufacturer's invoice number for vehicle/component

- MB Master Bill of Lading
- RZ Returned Goods Authorization Number
- SI Shipper's Identifying Number for Shipment (SID)

  A unique number (to the shipper) assigned by the shipper to identify the shipment
- TR Government Transportation Request

Refer to 003070 Data Element Dictionary for acceptable code values.

#### **ADX04** 127 Reference Identification

X AN 1/30

Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier

Segment: NTE Note/Special Instruction

**Position:** 090

Loop: ADX Optional

Level: Detail
Usage: Optional
Max Use: >1

Purpose: To transmit information in a free-form format, if necessary, for comment or special

instruction

**Syntax Notes:** 

**Semantic Notes:** 

Comments: 1 The NTE segment permits free-form information/data which, under ANSI X12

standard implementations, is not machine processable. The use of the NTE segment should therefore be avoided, if at all possible, in an automated

environment.

Segment: RMR Remittance Advice Accounts Receivable Open Item Reference

**Position:** 150

Loop: RMR Optional

Level: Detail Usage: Optional

Max Use: 1

**Purpose:** To specify the accounts receivable open item(s) to be included in the cash

application and to convey the appropriate detail

**Syntax Notes:** 1 If either RMR01 or RMR02 is present, then the other is required.

2 If either RMR07 or RMR08 is present, then the other is required.

**Semantic Notes:** 1 If RMR03 is present, it specifies how the cash is to be applied.

2 RMR04 is the amount paid.

3 RMR05 is the amount of invoice (including charges, less allowance) before terms discount (if discount is applicable) or debit amount or credit amount of referenced items.

4 RMR06 is the amount of discount taken.

5 RMR08, if present, represents an interest penalty payment, amount late interest paid, or amount anticipation.

**Comments:** 

- 1 Parties using this segment should agree on the content of RMR01 and RMR02 prior to initiating communication.
- 2 If RMR03 is not present, this is a payment for an open item. If paying an open item, RMR02 must be present. If not paying a specific open item, RMR04 must be present.
- 3 RMR05 may be needed by some payees to distinguish between duplicate reference numbers.

**Notes:** 

- 1. Use multiple iterations of the 2/RMR/150 loop as needed to indicate individual invoice numbers included within the remittance amount.
- 2. Use to identify all open items to be included in the cash application (i.e., invoices, seller credit memos, etc.). Include agency data as available, in all relevant data element in each iteration of an RMR segment.
- 3. Amount in RMR08 is included in the total of RMR04.

Segment: ADX Adjustment

**Position:** 210

Loop: ADX Optional

Level: Detail Usage: Optional

Max Use: 1

Purpose: To convey accounts-payable adjustment information for the purpose of cash

application, including payer-generated debit/credit memos

Syntax Notes: 1 If either ADX03 or ADX04 is present, then the other is required.

**Semantic Notes:** 1 ADX01 specifies the amount of the adjustment and must be signed if negative. If negative, it reduces the payment amount; if positive, it increases the payment

amount.

2 ADX02 specifies the reason for claiming the adjustment.

3 ADX03 and ADX04 specify the identification of the adjustment.

**Comments:** 

Notes: When payment amount varies from invoice amount, use multiple iterations of

this 2/ADX/210 loop as needed to identify one or more adjustments to the current

invoice indicated in the corresponding 2/RMR/150 loop.

Segment: **DED** Deductions

**Position:** 287

Loop: DED Optional

Level: Detail Usage: Optional

Max Use: 1

**Purpose:** To specify payment related information for child support payment deductions

**Syntax Notes:** 

**Semantic Notes:** 1 DED01 is the type of deduction.

- 2 DED02 is the code indicating the case identifier.
- **3** DED03 is the pay date.
- 4 DED04 is the payment amount.
- 5 DED05 is the social security number of the absent parent.
- 6 DED06 indicates if the obligor has family medical insurance coverage available through their employer. A "Y" indicates medical coverage is available. An "N" indicates there is no coverage. A "W" indicates that the disposition of medical insurance is not applicable to the deduction.
- 7 DED07 is the name of the absent parent. The absent parent's name contains the first seven letters of the obligor's last name followed by the first three letters of the obligor's first name. A comma must be used to separate the last name from the first name of the absent parent when the last name is less than seven characters.
- 8 DED08 contains the Federal Information Process Standard (FIPS) Code. The FIPS code is 5 characters when indicating both the state and county codes. It is seven characters when indicating state, county and local codes.
- 9 DED09 identifies to the child support enforcement agency that an individual's employment has terminated. A "Y" is used if the employee has been terminated otherwise the field is not used. DED04 may contain zero if this field is used.
